Teaching Fall 2017 I am teaching 10-606 (mini 1) and 10-607 (mini 2), Math Background for ML I & II. This is the same course as 10-600 from Fall 2016, but renumbered since CMU's registration system prefers different numbers for the two minis.. Fall 2015 I taught 10-601, the masters-level machine learning course, with Aarti Singh. I also taught this course in Fall 2009 with Miro Dudík.

These datasets are applied for machine-learning research and have been cited in peer-reviewed academic journals.

Datasets are an integral part of the field of machine learning. Major advances in this field can result from advances in learning algorithms (such as deep learning), computer hardware, and, less-intuitively, the availability of high-quality training datasets.

List of datasets for machine-learning research - Wikipedia

His work on Multitask Learning helped create interest in a subfield of machine learning called Transfer Learning. Rich received an NSF CAREER Award in 2004 (for Meta Clustering), best paper awards in 2005 (with Alex Niculescu-Mizil), 2007 (with Daria Sorokina), and 2014 (with Todd Kulesza, Saleema Amershi, Danyel Fisher, and Denis Charles), and ...

Humanities are academic disciplines that study aspects of human society and culture. In the Renaissance, the term contrasted with divinity and referred to what is now called classics, the main area of secular study in universities at the time. Today, the humanities are more frequently defined as any fields of study outside of professional training, mathematics, and the natural and social sciences.
