Manual testing is performed by the tester who carries out all the actions on the tested application manually, step by step and indicates whether a particular step was accomplished successfully or whether it failed. Manual testing is always a part of any testing effort. It is especially useful in the initial phase of software development, when the software and its user interface are not stable ...

### Manual Testing | TestComplete Documentation

The solutions manual is expensive, and publishers generally seem to try to keep complete solutions manuals from students. (Student solutions manuals typically only cover a portion of a textbook's exercises.) This is wrong on both counts. To make any math book complete, there must be a reliable source for solutions to all the exercises.
