Legacy Timber Frames designs, manufactures, and raises custom timber frame structures for residential, agricultural and light commercial construction. We can provide in-house custom design, work with your architect, or recommend an architect familiar with our timber frames.

Custom Timber Frame Structures

Roof framing is the next building component found within the load path. The roof framing must support the roof decking and sheathing and resist loads applied to the sheathing and transfer loads vertically to support walls (or frames).

BUILDING FRAMING SYSTEMS AND BEST PRACTICES Building ...

Located in Central New York, this larch timber frame porch creates a beautiful transition from interior gambrel timber frame to outdoor patio and waterfall. New Heritage Woodworking is committed to the tradition and craft of timber framing.

Timber Frames by New Heritage Woodworking

The framing of a basic gable roof is based on a right-angle triangle, and the various roof framing components fit the triangle. The rise, or height of the roof at its peak, is the altitude of the triangle; the run, or half the building span, is the base of the triangle; and the line length, measurement from the roof peak to the building wall, is the hypotenuse.

WOOD-FRAME HOUSE CONSTRUCTION - USDA

tractor was building furniture, and I was framing a house. Unlike finish carpentry, framing doesn't have to look perfect or satisfy your desire to fit together two pieces of wood precisely. Whether you're building a house, an addition, or a simple wall, the goals when framing are strength, efficiency, and accuracy.

Ten Rules for Framing - Fine Homebuilding

Framing Roofs shows how to work with speed and precision, and, since working on a roof is often a complicated and dangerous task, safety is always at the forefront. Fine Homebuilding has been providing rock-solid information and inspiration to everyone who cares about quality home improvement and construction since 1981.

Framing Roofs - Editors of Fine Homebuilding - Google Books

Builder Tim Lee inserted an expressive eyebrow window on the copper roof of a garage-turned-guesthouse in Locust Valley, New York. Photo by John Kernick. Imagine cutting a horizontal slit in your roof and then, from underneath, pushing on the uphill side, raising a little wave in the plane of the shingles.
