Cooling system is critical for an outboard to live. It only takes a few seconds, especially running at high RPM's, for an overheat situation to kill an outboard powerhead. Do not rely on a water hose to check your impeller. A water hose will pressurize the system, overriding the impeller, and giving a false sense that impeller is ok.

Troubleshooting guide Troubleshooting is a problem solving strategy used to trace and correct faults in the outboard's mechanical or electrical system. It will help identify why an outboard engine will not start, what's causing the motor to idle rough or stall, what's preventing the engine from accelerating normally, and much more.
