Made In The Usa Rise

In "Made in the USA," Vaclav Smil powerfully rebuts the notion that manufacturing is a relic of predigital history and that the loss of American manufacturing is a desirable evolutionary step toward a pure service economy. Smil argues that no advanced economy can prosper without a strong, innovative manufacturing sector and the jobs it creates.

Made in the USA: The Rise and Retreat of American ...

He explains how manufacturing became a fundamental force behind America's economic, strategic, and social dominance. He describes American manufacturing's rapid rise at the end of the nineteenth century, its consolidation and modernization between the two world wars, its role as an enabler of mass consumption after 1945, and its recent decline.

Made in the USA: The Rise and Retreat of American ...

Life enriched, and burdened, by an enormous and still increasing variety of manufactured products is a recent phenomenon. All but a few people in preindustrial societies lived with a minimum of simple possessions as only the richest could own good-quality artisanal products, made as unique items or in small series.
