Carpathians are crucial for the ecological connectivity as they occupy the narrow part of the mountain arc linking its massive northern and southern sections, thus forming a bottleneck for animal migration within the Carpathians, as well as between the Southern, Western, and Eastern Europe (Webster et al. 2001). This

Carpathians can manipulate nature, such as drawing cloud cover if they need to be outside during the daytime or creating lightning when they incinerate a vampire's heart and body.

Carpathians | Dark Series Wiki | Fandom

The Carpathian Mountains or Carpathians (/ k ɑ: r ' p eɪ θ i ə n z /) are a range of mountains forming an arc throughout Central and Eastern Europe. Roughly 1,500 km (932 mi) long, it is the third-longest European mountain range after the Urals at 2,500 km (1,553 mi) and the Scandinavian Mountains at 1,700 km (1,056 mi). The range stretches from the far eastern Czech Republic (3%) in the ...

Post Forum Carpaticum Publications

Current regional policies and land management practices have enormous significance for the maintenance of various values of the Carpathian region, e.g., cultural landscapes, agricultural or forest biodiversity. There is a need to integrate planning across sectors and spatial scales, linking local and regional policies.
