The Four Elements Of Architecture

The Four Elements of Architecture is a book by the German architect Gottfried Semper. Published in 1851, it is an attempt to explain the origins of architecture through the lens of anthropology. The book divides architecture into four distinct elements: the hearth, the roof, the enclosure and the mound. The origins of each element can be found in the traditional crafts of ancient "barbarians":

The Four Elements of Architecture - Wikipedia

Though he wrote his theories over 200 years ago, Gottfried Semper's ideas about the four elements of architecture, the primitive hut, and biomimicry are still relevant to modern architecture. Because of this, his teachings are especially important in Design 8, the final studio of the undergraduate design sequence. (en) General Note:
