TRANSMISSION. The transmission features an aluminum case (7005) with an integral clutch housing. Because of the aluminum case, the tapered roller bearings of the transmission shafts must be fitted under preload. This is because heat expansion of the aluminum case is greater than that of the steel alloy mainshaft and countershaft cluster gear

Thanks to its robust design, the manual 6-speed transmission achieves a long service life combined with low maintenance requirements. The compact aluminum housing, an integrated clutch bell housing, and the weight-saving gearshift systems all reduce the curb weight of the vehicle and increase the payload.
